

RIZO-LIQ SOYBEAN

Warning

- Store in a cool (4-24°C), dark, dry place.
- Do not use after expiry date.
- Do not use near to pesticides.
- Do not use for any other purpose except as indicated.
- Use immediately after the packet has been opened.
- Not harmful to humans and animals.

Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be effective under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label, as well as by the method, time and accuracy of application. Furthermore the registration holder does not accept responsibility for damage to crops, vegetation, the environment, or harm to man or animal, or for lack of performance of the remedy concerned, due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

Direction for use: Use only as indicated on this label.

Application method	Dosage / 100 kg of seed	Remarks
Seed treatment or infurrow		
Seed treatment Rizo-Liq Soybean	300ml	Apply to the seed and mix thoroughly until it is evenly coated.
Infurrow Rizo-Liq Soybean	300-400 ml per hectare	Mix with water and apply infurrow directly on the seed.

Note: Please ensure the seed is dry before planting starts. Use talc/graphite to shorten this interval.

Pelliclar Protector: We recommend the use of Pelliclar protector with the Rizo-Liq Soybean Inoculant which will help to increase bacterial survival on the seed or in the soil under most stress conditions. Prepare the Pelliclar Protector and the Rizo-Liq Soybean Inoculant and be added to the seed and mix thoroughly until it is evenly coated. Plant treated seed as soon as manageable.

Note: The seed quality, size, moisture content and germination percentage prior to treatment will affect the seed treatment load quantity and consistency of the seed after treatment. Please ensure that seed quality has been tested prior to treatment. This product was tested on registered and certified seed, and recommendations are made accordingly to ensure quality in seed treatment performance and planting practices. High humidity may result in seed becoming sticky after treatment. If this occurs, or if the time between mixing and planting needs to be shortened, slow planting recommendations for the use of talc and graphite to dry seed out. If the application of talc/graphite is not necessary, please refer to the label for the use of talc and graphite to dry seed out. If the application of talc/graphite is not necessary, please refer to the label for the use of talc and graphite to dry seed out. If the application of talc/graphite is not necessary, please refer to the label for the use of talc and graphite to dry seed out.

Important: 20 day pre-treatment of seed
Rizo-Liq Soybean Inoculant has been manufactured with OSMO-PROTECTOR technology which allows planting up to 20 days after inoculant and add this to the seed and mix thoroughly until all the seeds are evenly coated. Do not use any further water or other foreign liquid in the application. Open the seal in the bag and store in a cool (4-24°C), dark, and well ventilated place.

N-Factor 2

RIZO-LIQ SOYBEAN

Reg No: L 8738 Act No. 36 of 1947

OSMO PROTECTED INOCULANT
(Bacterial legume Inoculant for the effective nitrogen fixation on soybean (*Glycine max*))

Active ingredient: Live legume bacteria for soybean (*Bradyrhizobium japonicum*)
Minimum 6.5 x 10⁹ cfu/ml

Batch No: **Expiry Date:** 18 months from date of manufacture

RIZOLIQSO1

RizoLiq Soybean 150ml

Net Content
150 ml
Treats up to
50 kg of seed

Summary:

Bacterial legume Inoculant for the effective nitrogen fixation on soybean (*Glycine max*)

Details:

Live legume bacteria for soybeans

(*Bradyrhizobium japonicum* strain WB₇₄) Minimum 2 x 10⁹ cfu/ml
